

Contents

Preface.....	xi
1. TurboGXplus Frame Buffer.....	1
TurboGXplus Supported Monitors	1
Default Screen Resolutions.....	3
Programming the Screen Resolution.....	3
Configuring Monitors Using a UNIX Script.....	5
Configuring Monitors Using the PROM Method	5
Setting up a Single Monitor Using the PROM Method....	6
Setting up a Single Monitor Using a UNIX Script.....	7
Setting up Multiple Monitors using a UNIX Script.....	7
2. S24 Frame Buffer.....	9
S24 Application Compatibility.....	9
S24 Frame Buffer Screen Resolutions	10
Default Screen Resolutions.....	11
Changing the Screen Resolution.....	11

3. ZX and TurboZX Graphics Accelerator	13
ZX Supported Monitors	14
Default Screen Resolutions	15
Supported Screen Resolutions	16
Changing the Screen Resolution Temporarily	16
Modifying the <code>leoconfig</code> Initialization File	17
ZX Graphics Accelerator Restrictions	20
Using a Non-Sun Monitor as Console	20
Restrictions to Changing the Default Screen Resolution ..	20
4. SX Frame Buffer	23
SX Supported Monitors	24
Default Screen Resolutions	25
Changing the Screen Resolution	26
Changing the Pixel Depth	27
5. Creator Graphics Accelerator	29
Default Screen Resolutions	30
Supported Screen Resolutions	30
Changing the Screen Resolution Temporarily	31
Changing Screen Resolution to Stereo	32
Changing the Visual List Order	32
6. Creator Window System	33
Introduction	33
Creator Visuals	34
Default Visual	34

List of Visuals	34
Overlay/Underlay Structure	36
Comparison with the SX Accelerator	37
Comparison with the ZX Accelerator	38
Hardware Color LUT Usage	40
Reducing Colormap Flashing	40
Advice to End Users	41
Advice to Programmers	41
Hardware Window IDs	42
Cursor Management	43
Hardware Double Buffering	44
Device Configuration	45
Performance Notes	45
Direct Xlib	45
X11perf -shmput<nn>	46
No Creator Pixel Copy Hardware	46
Miscellaneous	46
Background None Window Transient Color Effects	46
7. XIL Acceleration on Ultra/Creator	49
Introduction	49
XIL Data Types	49
Classes of XIL Functions	50
Accelerated Functions	50

8. Multiple Monitors on a System	53
Multiple Monitor Configuration	53
Device File Names	54
Checking the Available Frame Buffers	55
Starting OpenWindows from the Console	56
Running OpenWindows on Multiple Monitors	56
Changing the Polling Order	58
SBus Addresses	58
Polling Order	59
Changing the sbus-probe-list	59
