

# Index

---

## A

alarm  
  setting and clearing, 152  
alarms utility, 151, 155  
API, 40  
Application Programming Interface, *see* API

## B

base name, 47  
boot  
  disk, 42  
  storage device, 49  
boot disk  
  remirroring, 86, 177

## C

clearng an alarm, 152  
CMS  
  configuring, 8  
  split mode interaction, 45  
cmsconfig, 77, 81, 85, 147, 168, 172, 176  
cmsfruinfo, 109, 149  
cmsmonitord, 106  
cmsphonehome, 145  
combined mode, 39, 41  
communication network, 45  
config.icn, 45

configuration file  
  editing, 47  
  ICN, 40, 45  
  split daemon, 40, 45  
Configuration Management System, *See* CMS  
configuring  
  console, 30  
  ft\_network, 10, 14, 18  
  multiplexor, 29  
  OSdog, 95  
  serial connection, 33  
    highly redundant, 38  
    nonredundant, 34  
    redundant, 37  
  user pat daemon, 108  
console  
  access, 27  
  configuring, 30  
  file system access, 28  
  messages, 30 to 33  
  port, 27  
console-devices, 31  
controller  
  change, 20  
  serial, 27  
  set, 20  
CPUset, 148

## D

daemon  
  split mode, 42

- user pat, 107
- Data Link Provider Interface, *See* DLPI
- data storage device, 49
- device
  - Ethernet, 1, 2
  - quiescing, 50
  - serial, 28
- disabling
  - module, 114
- DLPI
  - network functionality, 45

## E

- EEPROM, 46, 95, 125, 149
- eject, 113
- enabling
  - CPUsset, 148
  - modules, 54
  - new motherboard, 125
- error messages
  - ft\_network, 23
- Ethernet device, 1, 2

## F

- force option in split mode, 57
- ft\_network
  - configuring, 10, 14, 18
  - error messages, 23
  - troubleshooting, 23
  - unconfiguring, 12, 16
- ft\_serial
  - files, 30
  - messages, 30 to 33

## G

- get\_domain\_attributes, 44
- get\_slot\_status, 44

## H

- high level interrupt, 102
- hot swapping
  - motherboard, 149

## I

- ICN
  - configuration file, 40, 45
  - driver, 40, 45
  - inter-daemon communication, 48
- icn\_system, 81, 90, 172
- ifconfig, 4, 81, 172
- installing
  - network, 5
- Inter-CPUset Network, *See* ICN

## K

- kadb, 104, 105

## M

- MAC addresses, 3
  - allocation, 3
- master domain, 43
- merge
  - winner, loser, 43
- merge, 54, 84, 175
- merging a split system, 53
- messages
  - console, 30 to 33
  - error
    - ft\_network, 23
- module
  - disabling, 112, 114
  - enable, 54
- motherboard
  - enabling, 125
  - hot swapping, 149
  - inserting in chassis, 122
  - removal, 112, 115
  - replacing, 111
  - securing screws, 121

- updating EEPROM, 125
- multiplexor, 28
  - configuring, 29

## N

- network
  - booting, 5
  - communication, 45
  - failure detection, 5
  - fault-tolerant, 1
  - installing, 5
- node name, 47
- NVRAM, 46, 53
  - device, 95
  - log, 103

## O

- OpenBoot PROM, 3, 28, 45, 46, 54, 95, 104
  - device node, 101
- OSdog, 93
  - configuring, 95
  - devices, 94
  - disabling, 96
  - driver, 96
  - enabling, 96
  - handling panics, 104
  - ioctl's, 98
  - operation in Solaris, 94
  - pat, 94
  - patting daemon, 99
  - timeout, 97, 101, 105
    - hardware event, 101
    - software event, 102
    - values, 97
  - timer, 94
  - timer reset, 94
  - troubleshooting, 110
  - using with a debugger, 104
- ownership transfer, 51

## P

- pnet

- configuring CMS, 8
- confirming connection, 25
- disabling, 9
- driver, 1
- failure handling, 5
- interface, 2

- PRI, 43, 54

- Processor Re-Integration, *See* PRI

## Q

- quiescing devices, 50

## R

- rconsconfig, 31 to 33
- remirroring the boot disk, 86, 177
- resource ownership, 40, 49, 51
- restrictions in split mode, 53
- rlogin, 112

## S

- serial
  - controller, 27
  - device, 28
- serial connection, 28
  - configuring, 33
    - highly redundant, 38
    - nonredundant, 34
    - redundant, 37
- set\_domain\_attribute, 44
- set\_slot\_owner, 44
- setting an alarm, 152
- SEVM, 46, 50, 55, 86, 113, 114, 126, 177
- slot ownership, 49
- snoop, 8
- Solaris, 94
- split, 54, 75, 166
- split daemon
  - configuration file, 40, 45
  - synchronizing, 40, 53
- split master specification, 48

- split mode, 39, 41
  - architecture, 40, 41
  - configuration files, 45
  - daemon, 42
  - domains, 39
  - fixed modules, 41
  - force option, 57
  - libraries, 44
  - operations, 46
  - recovery in, 89
  - restrictions in, 53
  - timeout, 45
  - upgrading software, 58
  - user interface, 43
  - winner, loser, 39, 42
- split\_lock, 44
- split\_unlock, 44
- splitadm, 43, 53, 57
- splitconf, 43, 52, 84, 175
- splitd.conf, 45
- splitinfo, 43, 52, 80, 171
- splitting a system, 46
- status log, 102
- storage device
  - boot, 49
  - data, 49
- Sun StorEdge Volume Manager, *See* SEVM
- system clock, 110
- system identity, 56

## T

- terminal characteristics, 38
- termios, 31
- test packet, 5
  - transmission time, 6
- transferring ownership, 51
- troubleshooting
  - ft\_network, 23
  - OSdog, 110
- ttymux, 28
- ttymuxadm, 28, 33

## U

- u4ftalctl(1M), 151
- u4ftctl, 82, 173
- u4ftdog, 96 to 100
- u4ftdogpat, 101
  - example, 106
- u4ftser, 28, 30
- u4ftsplite, 83, 174
- u4ftsplite.d, 40, 42, 53
- unconfiguring
  - ft\_network, 12, 16
- updating firmware, 147
  - boot checks, 148
  - enabling CPUset, 148
  - preboot checks, 147
- user pat channels, 99
- user pat daemon, 107
  - configuring, 108

## V

- vxdg, 114, 126
- vxdisk, 86, 114, 126, 177
- vxdiskadm, 87, 178
- vxrecover, 126
